

Site Review Notes

Creative Director: Eve W

Designer: Lily G

- Find a google font that looks like Franklin (not showing up on all browsers)
- Play around with title/header treatment, perhaps all caps and tracked out more, needs to be more considered—css “letter spacing” property
- Switch out first picture
- Keep all images purple duotone—for second color have purple on light grey background instead of current blue hue
- Link volunteer and donate to website links
- Adjust margins/line length on mobile, add another media query for phone
- Make images bleed if possible
- Adjust menu transition—right now a little awkward (if time) (maybe use a CSS animation?)
